

Arianne Mix Junior Developer

801-830-1579 | ariannejudkins@gmail.com

Summary

I was first exposed to programming in 2021, after completing an education in an unrelated field. Despite having an established education and career, I was fascinated by the world of web development. I have since discovered that I love to code, and have become efficient at teaching myself new concepts and technologies. My ability to adapt to new environments and learn languages and related skills independently sets me apart as a Junior Developer.

For more information on me and my certifications, visit my website at www.ariannemix.com

Education

BACHELOR OF ARTS | MAY 2019 | ARIZONA STATE UNIVERSITY

Major: History, 4.0 GPA

ASSOCIATE OF SCIENCE | MAY 2014 | UTAH VALLEY UNIVERSITY

- At DevPipeline, I have had the opportunity to work as a full-stack developer (using React and Flask) on both client and internal projects.

WEB DEVELOPMENT CERTIFICATION | APRIL 2021

- Official certification from SheCodes for skills in basic front-end development.

REACT CERTIFICATION | JUNE 2021

- Official certification from SheCodes for skills in React

Skills

FRONT-END

- Javascript
- React
- HTML
- Sass
- Firebase

BACK-END

- Python
- Flask
- SQLAlchemy
- Postgres
- SQL

COMMUNICATION & LEADERSHIP

During my music studies, I gave pre-concert talks for renowned pianists and musicians. As a volunteer in schools and communities and as the director of my own piano studio, I have had the opportunity to organize events and have learned how to effectively communicate on the individual and group level.

WORK ETHIC

My unique experience getting an education online while caring for two young children helped me develop a strong work ethic. My willingness to work enabled me to attain excellent grades during my studies at

ASU, and gave me ample performance and scholarship opportunities during my music studies, where I accompanied various choirs and soloists and won the Rebecca Marriott Champion Competition.

TIME MANAGEMENT

Both of my degrees were completed while also being a full-time, primary caregiver to my two young children, volunteering in my children's schools and in my community, and teaching piano lessons from my home. These years have taught me how to optimize productivity and organization in whatever environment or situation.
